Wear 207 (1997) 139–141

WEAR

Subject Index of Volume 207

Artificial joint fluid
phospholipids as boundary lubricants in wear tests of prosthetic joint materials, 86

Boundary lubrication
phospholipids as boundary lubricants in wear tests of prosthetic joint materials, 86
a scheme for hybrid molecular dynamics/finite element analysis of thin film lubrication, 100

Capacitive
oil film thickness measurement in the middle main bearing of a six-cylinder supercharged 9 litre diesel engine using capacitive transducers, 29
Cavitation
cavitation in noncircular journal bearings, 122
Compressor
the effect of pressurised gases on the viscosity of polyalkylene glycols, 24
Condition monitoring
maintenance tribology: its significance and activity in Japan, 63
Contact pressure
wear simulation with the Winkler surface model, 79
Contact recording
a review of 'contact recording' technologies, 118

Deep drawing
the influence of die geometry on tool wear in deep drawing, 10
Deterioration
maintenance tribology: its significance and activity in Japan, 63
Die geometry
the influence of die geometry on tool wear in deep drawing, 10
Dissolved gas
the effect of pressurised gases on the viscosity of polyalkylene glycols, 24

Elastohydrodynamic lubrication
transient non-Newtonian elastohydrodynamic lubrication analysis of an involute spur gear, 67
Electric-discharge-texturing
comparative study of shotblasted and electrical-discharge-textured rolls with regard to frictional behavior of the rolled steel sheet surfaces, 34
Environmentally adapted oils
environmentally adapted hydraulic oils, 41

Fatigue life
fatigue life reduction due to wear in boundary lubricated spherical roller thrust bearings, 74

Finite element
a scheme for hybrid molecular dynamics/finite element analysis of thin film lubrication, 100
Friction
comparative study of shotblasted and electrical-discharge-textured rolls with regard to frictional behavior of the rolled steel sheet surfaces, 34
Frictional heating
thin film thermocouple arrays for sliding surface temperature measurement, 46

Gears
simulation of mild wear in spur gears, 16

Head/disk interface
a review of 'contact recording' technologies, 118
Hybrid method
a scheme for hybrid molecular dynamics/finite element analysis of thin film lubrication, 100
Hydraulic oils
environmentally adapted hydraulic oils, 41
Hydrodynamic
oil film thickness measurement in the middle main bearing of a six-cylinder supercharged 9 litre diesel engine using capacitive transducers, 29

Ion implantation
application of advanced surface treatment technologies in the modern plastics moulding industry, 6
Ironing
screening the performance of lubricants for the ironing of stainless steel with a strip reduction test, 1

Journal bearing
cavitation in noncircular journal bearings, 122

Lip seals
modelling rotary lip seals, 92
Lubrication
the effect of pressurised gases on the viscosity of polyalkylene glycols, 24

Main bearing
oil film thickness measurement in the middle main bearing of a six-cylinder supercharged 9 litre diesel engine using capacitive transducers, 29
Maintenance
maintenance tribology: its significance and activity in Japan, 63
Maintenance system
maintenance tribology: its significance and activity in Japan, 63

Elsevier Science S.A.

Mild wear
simulation of mild wear in spur gears, 16
Mobility method
cavitation in noncircular journal bearings, 122
Molecular dynamics
a scheme for hybrid molecular dynamics/finite element analysis of thin film lubrication, 100
Multiphase pump
rotordynamic analysis of a vertical pump with tilting-pad journal bearings, 128

Nanotribology
a scheme for hybrid molecular dynamics/finite element analysis of thin film lubrication, 100
Near-contact recording
a review of 'contact recording' technologies, 118
Noncircular profiles
cavitation in noncircular journal bearings, 122
Non-linear
rotordynamic analysis of a vertical pump with tilting-pad journal bearings, 128
Non-Newtonian
transient non-Newtonian elastohydrodynamic lubrication analysis of an involute spur gear, 67

Oil film thickness
oil film thickness measurement in the middle main bearing of a six-cylinder supercharged 9 litre diesel engine using capacitive transducers, 29
Oil seals
modelling rotary lip seals, 92

PAG
the effect of pressurised gases on the viscosity of polyalkylene glycols, 24
Particulate contamination
on the modeling of multi-body interaction problems in tribology, 55
Phospholipid
phospholipids as boundary lubricants in wear tests of prosthetic joint materials, 86
Plastics moulding
application of advanced surface treatment technologies in the modern plastics moulding industry, 6
Polyethylene
phospholipids as boundary lubricants in wear tests of prosthetic joint materials, 86
Powder lubrication
on the modeling of multi-body interaction problems in tribology, 55
Prosthetic joint
phospholipids as boundary lubricants in wear tests of prosthetic joint materials, 86
Proximity recording
a review of 'contact recording' technologies, 118
PVD
application of advanced surface treatment technologies in the modern plastics moulding industry, 6

Real contact area
thin film thermocouple arrays for sliding surface temperature measurement, 46
Rotordynamics
rotordynamic analysis of a vertical pump with tilting-pad journal bearings, 128

Seals
modelling rotary lip seals, 92
Shaft cooling
experimental investigation of the effect of shaft heating and cooling on single bore journal bearing, 112
Shaft heating
experimental investigation of the effect of shaft heating and cooling on single bore journal bearing, 112
Simulation
simulation of mild wear in spur gears, 16
Slider designs
numerical Investigation of tri-pad sliders and comparison to other slider designs, 107
Slurry lubrication
on the modeling of multi-body interaction problems in tribology, 55
Spherical roller thrust bearings
fatigue life reduction due to wear in boundary lubricated spherical roller thrust bearings, 74
Spur gear
transient non-Newtonian elastohydrodynamic lubrication analysis of an involute spur gear, 67
Steel sheet
comparative study of shotblasted and electrical-discharge-textured rolls with regard to frictional behavior of the rolled steel sheet surfaces, 34
Stribeck diagram
a review of 'contact recording' technologies, 118
Strip reduction test
screening the performance of lubricants for the ironing of stainless steel with a strip reduction test, 1
Surface roughness
comparative study of shotblasted and electrical-discharge-textured rolls with regard to frictional behavior of the rolled steel sheet surfaces, 34
a review of 'contact recording' technologies, 118
Surface temperatures
thin film thermocouple arrays for sliding surface temperature measurement, 46
Surface treatment
application of advanced surface treatment technologies in the modern plastics moulding industry, 6
Synthetic lubrication
transient non-Newtonian elastohydrodynamic lubrication analysis of an involute spur gear, 67

Thermal expansion
experimental investigation of the effect of shaft heating and cooling on single bore journal bearing, 112
Thermohydrodynamics (THD)
experimental investigation of the effect of shaft heating and cooling on single bore journal bearing, 112
Thin film lubrication
a scheme for hybrid molecular dynamics/finite element analysis of thin film lubrication, 100
Thin film thermocouples
thin film thermocouple arrays for sliding surface temperature measurement, 46
Third body modeling and simulation
on the modeling of multi-body interaction problems in tribology, 55
Tilting-pad bearing
rotordynamic analysis of a vertical pump with tilting-pad journal bearings, 128
Tribology
maintenance tribology: its significance and activity in Japan, 63

Vertical pump
rotordynamic analysis of a vertical pump with tilting-pad journal bearings, 128

Viscosity
the effect of pressurised gases on the viscosity of polyalkylene glycols, 24

Wear
the influence of die geometry on tool wear in deep drawing, 10
fatigue life reduction due to wear in boundary lubricated spherical roller thrust bearings, 74
Wear simulation
wear simulation with the Winkler surface model, 79
Winkler surface model
wear simulation with the Winkler surface model, 79
